

Fruit Tree Pruning Class

Presented by: OSU Extension- Belmont & Monroe Counties

Objective- the objective of pruning fruit trees is to obtain maximum production of high quality fruit on a continual basis. When trees are maintained properly, they do not require a excessive trimming, but trees still need to be pruned annually. Light penetration is critical and must be maintained evenly around the tree for maximum production. Thinning cuts, where needed, can accomplish this and also improve one's ability to get good spray coverage throughout the tree.

Pruning Trees for Better Fruit

A variety of fruit trees will be available. Pruning will be demonstrated and questions answered. Orchard management and variety selection will also be discussed on this day.

Saturday

March 25, 2023

10:00 a.m. - 12:00 p.m.

Location:

**Doudna Orchard
35601 Chestnut Ridge
Rd., Barnesville, OH 43713**

Directions:
