THE OSU EXTENSION WQ TEAM PRESENTS A
NEW ANIMAL AGRICULTURE FOCUSED SERIES:
WEBINAR 1: DITCH & POND HEALTH

The OSU Extension Water Quality Team is working with the Ohio Department of Agriculture to kick off a bi-monthly, year-round webinar series. These webinars will specifically target topics related to our Certified Livestock Managers, but everyone is welcome. Each webinar will provide 1.5 CLM continuing education credits as well as 1.5 credit hours for CCAs. We hope these webinars will offer useful information and create a space for communication between all parties involved. To register for our series opener in August visit go.osu.edu/CLM. Make sure to stay tuned for more information on our next webinar in October.

The first webinar in this series will focus on ditch and pond health and how we can protect and improve water quality in these areas on our farms. Below you will find the sequence of topics we plan to cover. We are also excited to have our wonderful group of panelists available for questions at the end:

- Our WQEA Team
- Eugene Braig, Program Director, Aquatic Ecosystems Extension
- Katherine Shauger, Agriculture Environment Inspector, ODA-DLEP
- Chris Monroe, Environmental Specialist II, OEPA
- Curt Tobe, Ag Nutrient Technician, Putnam County SWCD

If you have any questions regarding this webinar, please contact our team at WaterQualityAssociates@osu.edu
