

Using Mindfulness Practices During COVID-19 Pandemic

By: **Patrice Powers-Barker**, **Michelle Treber** and **Rosanne Scammahorn**

Even before the arrival of COVID-19, stress had already been identified as a major health problem for Americans. Not only do we need to care for health and wellness when there is illness, but we also need to practice preventive care to stay well physically, mentally and emotionally.

The definition of mindfulness by Jon Kabat-Zinn is probably the most popular explanation of mindfulness in the United States of America: “Mindfulness means paying attention in a particular way: on purpose, in the present moment, and nonjudgmentally.”

What are some examples of mindfulness practice?

- Breathing exercises
 - For example, **JustBreathe** is a small, simple graphic to help you sync your breathing. Watch and follow with your inhales and exhales at yp4h.osu.edu/justbreathe
- Body scan meditation
- Imagery exercises
- Progressive muscle relaxation
- Mindful eating
- Intentional time with loved ones
- Focus on gratitude
- Yoga, tai chi, walking or other physical activity

(please see links below for clear instructions on different types of mindfulness practices)

At a time when the COVID-19 pandemic has changed everything in daily life for Ohioans, learning and practicing mindfulness can offer opportunities to better weather the challenging times as well as to be more present for big and small celebrations.

How do I get started in practicing mindfulness?

While the early mindfulness trainings in the United States of America, led by Kabat-Zinn and other professionals were often face-to-face instruction with many hours committed to trainings, now there are additional ways to learn about and practice mindfulness. Although some individuals prefer an in-person class, during this unprecedented time in which it is necessary to create physical distance between people, individual study or self-help resources may include books and workbooks, on-line trainings, apps and audio-visual materials. The resources listed below are free ways to practice mindfulness as well as respect the guidelines for social distancing.

Resources Specific to COVID-19 and Stress

- Centers for Disease Control and Prevention, COVID-19 Manage Anxiety & Stress cdc.gov/coronavirus/2019-ncov/prepare/managing-stress-anxiety
